- ◆ Procedures and reports can be tailored to your individual needs

CSI provides lessors the ability to verify their equipment is on site and in the reported condition prior to funding a lease.

Prefunding Inspection verifies the leasee has received all leased items and their descriptions match the Schedule A, develop serial numbers and provides clear digital pictures.

Business Verification determines the operating status of the leasee's business anytime during the lease.

Delinquency Inspection determines if the collateral is secure and whether or not the leasee is still in business. Onsite phone clearance can reestablish communication and make arrangements for payment of past due amounts.
